

PREPARED FOR BUYERS ADVOCATE
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

AI does not think Buyers Advocate is a company

A buyer ready to spend asks ChatGPT who to use. It gives them one answer, a name, and they ring it. There is no page two. On 6 August we asked 35 times and checked what came back.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best buyers advocates in Melbourne?"

WHAT CAME BACK

- 15 of 35** sampled answers used your website as a source. More than any other website in the study, including every competitor and every industry body.
- 5 of 8** times we asked who Buyers Advocate is, the machines answered that they did not know.
- 7** competitors named in its place, in a single live answer on 7 August.

WHAT IT SAID, WORD FOR WORD

We asked Claude directly who you are. Its opening sentence:

"'Buyers Advocate' isn't one specific company here. It's the general term Melbourne buyer's agents use to describe the role."

It then named seven Melbourne firms that use the phrase, recommended REBAA's directory as the place to find a good one, and did not name you at any point.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, named: Cate Bakos Property, Property Mavens, Davidson Property Advocates, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers, Parker Buyer Advocates.

WHY THIS MATTERS

Your website is the single most-quoted source in this category, and the machine reading it has concluded you are a job title rather than a business. Your content is being used to introduce buyers to seven of your competitors. That is not a ranking problem and no amount of content fixes it, because the machine is not failing to rank you. It is failing to see that you exist.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
