

PREPARED FOR CATE BAKOS PROPERTY
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

You won ten of thirty-five. Someone else won the other twenty-five.

A buyer ready to spend asks ChatGPT who to use. It gives them one answer, a name, and they ring it. On 6 August we asked 35 times, and you performed better than anyone else we screened. This is about the gap.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best buyers advocates in Melbourne?"

WHAT CAME BACK

10 of 35 sampled answers named Cate Bakos Property. More than any other firm in the study.
5 times you were listed first.
25 of 35 answers did not name you at all. Same question, same day, fresh session each time.

WHAT THAT ACTUALLY MEANS

Your details came back right. Your team names were correct. We would rather tell you that than invent a problem.

But twenty-five times out of thirty-five, a buyer asking the single most valuable question in your category was handed somebody else's name.

Not because anything is wrong. Because the machine chose differently that time, and nothing you can see tells you when or why.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, also named: Property Mavens, Davidson Property Advocates, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers, Parker Buyer Advocates.

WHY THIS MATTERS

You are the most visible buyer's advocate in Melbourne and you are still absent from seven answers in ten. Every other line in your marketing has a before and an after. This one does not. You have the most to lose here precisely because you are currently winning, and you would be the last to know if that moved.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
