

PREPARED FOR CONCIERGE BUYERS ADVOCATES
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

Twenty-eight times out of thirty-five, a buyer was given someone else's name

A buyer ready to spend asks ChatGPT who to use, and rings the name it gives. There is no page two. On 6 August we asked 35 times, and for a firm with no shopfront you did respectably.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best buyers advocates in Melbourne?"

WHAT CAME BACK

- 7 of 35** sampled answers named Concierge Buyers Advocates, at positions 4 and 7.
- 9 of 35** answers used your website as a source.
- 28 of 35** answers named somebody else and not you.

AND SOMETHING YOU SHOULD KNOW ABOUT

Your website does not name a principal and does not publish an address. When we asked the machines who runs Concierge, they answered anyway.

They produced a founder, a founding year, staff first names, and two performance figures.

Some of it is right. We checked. But none of it came from you, because you publish none of it. The account of who you are, being read to buyers today, was assembled entirely by other people.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, also named: Cate Bakos Property, Property Mavens, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers, Davidson Property Advocates.

WHY THIS MATTERS

You built a flat-fee, no-storefront model deliberately, and it works. But it has left the machines to write your introduction for you, from sources you did not choose and cannot see. Four times in five, the buyer heard a competitor's name instead of yours, and nobody rang to tell you.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
