

DRAFT, NOT FOR SEND. FOUR CLAIMS ABOUT PAUL GARSON NEED CHECKING

PREPARED FOR MELBOURNE BUYERS ADVOCATES

6 AUGUST 2026 . MEASURED, NOT ESTIMATED

The machines are reading your site and cannot tell that it is yours

A buyer ready to spend asks ChatGPT who to use, and rings the name it gives. There is no page two. On 6 August we asked 35 times and checked what came back.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best buyers advocates in Melbourne?"

WHAT CAME BACK

9 of 35 sampled answers used your website as a source.

0 answers named you as a recommended firm that we could attribute to you with confidence.

THE PROBLEM, AND IT IS NOT CARELESSNESS ON YOUR PART

Your business name is also the phrase every buyer types. When an assistant writes those three words, neither a reader nor the machine can tell whether it means your firm or the whole category.

We can show you this precisely. A competing Melbourne firm carries your exact business name as the title of its homepage.

Two different businesses, one string. In the sampled answers, facts about each appeared under wording that could have described either.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, named: Cate Bakos Property, Property Mavens, Concierge Buyers Advocates, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers.

WHY THIS MATTERS

Your content is being read nine times in thirty-five and is not reliably being attached to you. Every enquiry that starts in an AI answer is invisible in your funnel: no impression, no click, no record, just a buyer you never met. The name that once helped you be found is now the reason you cannot be identified.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
