

PREPARED FOR METROPOLE MELBOURNE
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

Metropole Melbourne did not come up. Not once in thirty-five answers.

A buyer ready to spend asks ChatGPT or Claude who to use. It gives them one answer, a name, and they ring it. There is no page two. On 6 August we asked 35 times, in fresh sessions, from Melbourne.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best buyers advocates in Melbourne?"

WHAT CAME BACK

- 0 of 35 sampled answers named Metropole Melbourne.
- 0 of 35 answers contained the name Yardney.
- 0 of 35 answers used your Melbourne page as a source.

AND HERE IS THE PART THAT SHOULD BOTHER YOU

We then asked the same machines about Metropole by name. They answered accurately and in detail: the founding year, the offices, your Brighton address correct to the street number, and nine of your people by name and role.

So they are not missing information about you. They have it, and it is right.

They simply never reach for it when somebody is asking who to use.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, named: Cate Bakos Property, Property Mavens, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers, Davidson Property Advocates, Empower Wealth.

WHY THIS MATTERS

You have spent decades building one of the largest content operations in Australian property. That work is in the machines. It is accurate. And in thirty-five attempts it did not once turn into a recommendation. Being known and being chosen are two different things, and only one of them books a client.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
