

DRAFT, NOT FOR SEND. VERIFY ALL THREE ABNS ON ABN LOOKUP FIRST

PREPARED FOR VISION BROKERS AND ADVISORS
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

Vision Brokers did not come up once in fifty-nine answers

An owner thinking about selling asks ChatGPT who to use, and rings the name it gives. Nobody rings you to tell you it happened. On 6 August we asked 59 times, in fresh sessions, from Melbourne.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best business brokers in Melbourne?"

WHAT CAME BACK

- 0 of 59 sampled answers named Vision Brokers and Advisors.
- 0 of 59 answers used your website as a source.
- 1 of 10 firms we screened scored nothing on every measure. It was yours.

AND WHEN WE ASKED ABOUT YOU BY NAME

The assistants did answer. They just did not agree with each other.

Across the sampled runs they gave three different company registration numbers for your business, and one placed your head office at an address that is not yours.

Different answers to the same question, on the same afternoon. A seller sees exactly one of them, and has no way to know there were others.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 59 times on 6 August 2026, named: LINK Business Brokers, Benchmark Business Sales, Xclusive Business Sales, Aussie Business Sales, VIC Brokers, Morgan Business Sales, Finn Business Sales.

WHY THIS MATTERS

Four offices, deals to twenty-five million, and in fifty-nine attempts a Melbourne seller was never once pointed at you. That is not a marketing problem you can see in your analytics, because there is no impression, no click and no record. Just a conversation you were never in.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
