

PREPARED FOR BUYERS ADVOCATE  
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

## The machines are reading your website constantly, and still getting Buyers Advocate wrong

A buyer ready to spend asks ChatGPT who to use. It gives them one answer, a name, and they ring it. There is no page two. On 6 August we asked 35 times and checked what came back.

### THE QUESTION YOUR BUYERS ARE ASKING

*"Who are the best buyers advocates in Melbourne?"*

### WHAT CAME BACK

**15 of 35** sampled answers used your website as a source. More than any other website in the study, including every competitor and every industry body.

**5 of 8** times we asked the machines who Buyers Advocate actually is, they answered that they did not know.

### ONE THING IT SAID

Your content is what the machines are reading. Your business is not what they are recognising.

One assistant that did attempt a description placed your office in Hawthorn. You are not in Hawthorn.

It did not guess. It named a source for it, and the link works, which is precisely why nobody has ever checked it.

### WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 35 times on 6 August 2026, named: Cate Bakos Property, Property Mavens, Davidson Property Advocates, Property Home Base, Wakelin Property Advisory, BuyerX, National Property Buyers, Parker Buyer Advocates.

### WHY THIS MATTERS

You are the most-quoted source in your own category and the machines still cannot reliably tell a buyer who you are. Your work is being used to recommend other people. That is a strange and expensive position to be in, and it is not one you can see from inside your own business.

#### What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

#### Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
