

DRAFT, NOT FOR SEND. VERIFY THE ELSTERNWICK ADDRESS AND THE BRISBANE ATTRIBUTION

PREPARED FOR LLOYDS BUSINESS BROKERS
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

Fifty-five times out of fifty-nine, a seller was given someone else's name

An owner thinking about selling asks ChatGPT who to use, and rings the name it gives. Nobody rings you to tell you it happened. On 6 August we asked 59 times, in fresh sessions, from Melbourne.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best business brokers in Melbourne?"

WHAT CAME BACK

- 4 of 59** sampled answers named Lloyds Business Brokers.
- 2, 2, 4** the positions you held when named. High when you are there.
- 55** answers did not mention you at all.

AND ONE THING IT TOLD US ABOUT ITSELF

Asked directly about Lloyds, one assistant placed your Managing Director in the wrong state.

Another named nobody at all, and said plainly that it was working from your company name rather than from anything it actually knew about the firm.

That second answer is the more useful one. It is the machine admitting it is producing something plausible rather than something known. A seller reading the polished version never sees that line.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 59 times on 6 August 2026, named: LINK Business Brokers, Benchmark Business Sales, Xclusive Business Sales, Aussie Business Sales, VIC Brokers, Morgan Business Sales, Trident Business Sales.

WHY THIS MATTERS

Forty years in corporate sales, and in fifty-five conversations out of fifty-nine your name did not come up. When it did, you ranked second. So this is not a quality problem, it is a reach problem, and it is happening in a channel where you have no impressions, no clicks and no record to look at.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.

Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.

You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
