

PREPARED FOR TRIDENT BUSINESS SALES
6 AUGUST 2026 . MEASURED, NOT ESTIMATED

What AI is telling your sellers about Trident's accreditation is not right

An owner thinking about selling asks ChatGPT who to use. It gives them one answer, a name, and they ring it. Nobody rings you to tell you it happened. On 6 August we asked 59 times and checked what came back.

THE QUESTION YOUR BUYERS ARE ASKING

"Who are the best business brokers in Melbourne?"

WHAT CAME BACK

6 of 59 sampled answers named Trident Business Sales.
1, 2, 2, 3, 4 the positions you held when named. When you appear, you appear near the top.
53 answers did not mention you at all.

ONE THING IT SAID

Asked directly about Trident, one assistant told us your firm holds membership of the Australian Institute of Business Brokers and Certified Practising Business Broker status.

Your own website, captured the same day, claims neither. It names one body, and it is not the AIBB.

A seller comparing brokers on accreditation is being handed a credential you have never claimed. If it is wrong in your favour today, it can be wrong against you tomorrow, and you will not be told either way.

WHO IT NAMED INSTEAD

ChatGPT and Claude, sampled 59 times on 6 August 2026, named: LINK Business Brokers, Benchmark Business Sales, Xclusive Business Sales, Aussie Business Sales, VIC Brokers, Morgan Business Sales, Business Brokers Victoria, Finn Business Sales.

WHY THIS MATTERS

Broking is bought on trust, and trust is bought on credentials. The machines are describing yours to people who will never call to check. You spent years earning your accreditation; the version being read out was assembled without you, and it is already wrong in one place we can prove.

What this gives you

This is the only sales channel you cannot see: no impression, no click, no record, so nothing in your reporting will ever show you the buyer who asked a machine and was handed someone else's name. We measure what the assistants actually say when a buyer asks who to use, counted and dated, so you can read what they read. Already paying someone for search or AI work? Keep them. We tell them where to aim, and tell you whether it worked.

Why you, and who is doing this

You were chosen, not scraped. We measure a small number of firms whose work suggests they would actually want the answer, and we do it before making contact. That is why this page already exists.
Lee Powell runs every assessment himself. Thirty years in commercial software, creator of Scrivener for Windows and its million-plus writers, two companies built and sold, previously IBM, banking and pharmaceutical systems, Oxford masters on a full scholarship. Someone who can talk business and read the machine.
You will know what the machines say about your business before your competitors know about theirs. When something moves, you will be able to prove it moved and say when it started, because nobody can measure backwards and a baseline begun today is one they cannot buy at any price. And whatever this costs later, it will never cost you more than it does now.

Assessment A\$990, or A\$1,490 with a 90-day re-measure that puts a before and after on paper. Delivered personally within five business days. If the machines already have you covered, we will show you that, and there is nothing for you to buy.
